

# FREE MINI IDENTIFICATION GUIDES TO MAINE SPECIES

From the creators of the series that brought you *The Plants of Acadia National Park*, these guides are designed to distill the decades of experience that enables professional naturalists and biologists to recognize each species from observing just a few key characteristics.

# Maine Natural History Observatory

Censusing Maine Biota Since 2003

### Photos

Cover: Surveying plants in Baxter State Park by Sarah O'Malley; Blackburnian Warbler and Canada Lily by Logan Parker; William Procter insect collection and Seal Island by Glen Mittelhauser, Inside: Downy Woodpecker by Logan Parker; fir and spruce photos by Glen Mittelhauser; Black-and-white Warbler by Logan Parker; Euthora cristata, seaweed microscope, and Ulva linza by Jordan Chalfant; Northern Saw-whet Owl by Logan Parker; class with owl box by Carolyn Lewey; Eastern Whip-poor-will by Logan Parker Back: White Pond Lily by Logan Parker

# MONITORING CHANGING POPULATIONS

plants • animals • seaweed • insects

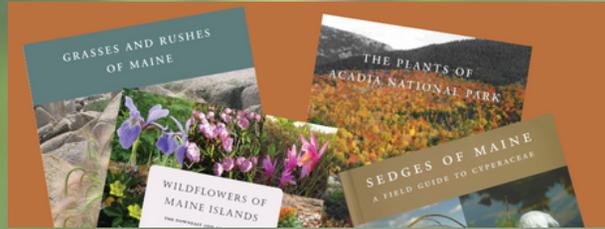

*"We are always thinking about the biologists 50 years from now and what legacy we want to leave them."*

- Glen Mittelhauser  
MNHO Founder

# UNDERSTANDING MAINE SPECIES

## Field Guides

Co-Created by the Observatory

## Seaweeds

An ongoing project to publish a user friendly, photographic field guide to make seaweed identification simple for outdoor enthusiasts and experienced biologists alike.

## Birds

- Monitoring Maine's rare owls.
- Nest boxes for Kestrel, Eastern Bluebird, and Saw-whet Owl.
- Surveying Whip-poor-wills and Nighthawks.

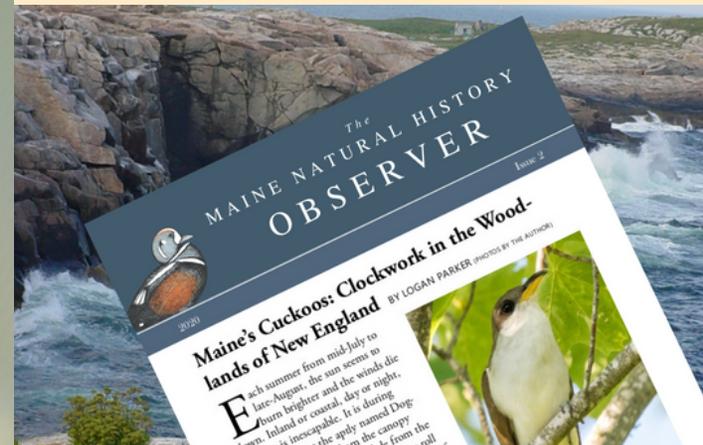

# BECOME A MEMBER

FOR AS LITTLE AS \$10 A YEAR AND RECEIVE...

- A year subscription to the *Observer* field journal
- 10% off book purchases from the Observatory's online shop
- The knowledge that your contribution facilitates the research and protection of Maine plants, animals, and habitats
